	Date	User ID	Log Text		
	6/16/2009 2:00:15 PM	SSMITH	Merge ID 2		

All merges are logged in the *iMIS* change log.

iMerge rapidly merges membership records.

- Allows *iMIS* end users to merge duplicates on the fly
- Supports batch merging
- Accommodates company flowdown for merging company records
- Optionally calls a stored procedure enabling custom merge rules

“Using iMerge is an easy way to combine a duplicate record to the legitimate record without losing any of the member activity, dues, subscription or meeting history.”

Laurie Newhouse, Wisconsin REALTORS Association
