

CUSTOMIZE IMIS PUBLIC VIEW AND RISE WITH EASE.

1 **Customize iMIS Public View and iParts**
 Using a simple interface, make changes to existing web appearance and functionality. The possibilities include text replacement, image and/or text removal, stored procedure activation, and URL redirects.

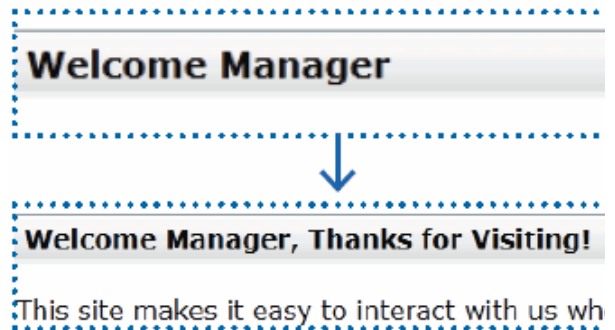

3 **Turn customizations on or off**
 Customizations can be activated and de-activated on the fly. Want the logout button to drop you onto your current event splash page? You can turn that on and then after the event is over, turn it off.

2 **Your changes are safe**
 Changing underlying text on your webserver means that the change is lost with each upgrade. With PageFilter, your changes are preserved.

4 **Support coupons with Public View events**
 Using the included stored procedure, you can offer coupons for event registrants.

REMOVE UNWANTED LINKS.

ADD TEXT TO ANY PAGE.

What They're Sayin'

"I am loving the PageFilter product!
 It's so easy to use!"
