

RAPIDLY MERGE DUPLICATE MEMBERSHIP RECORDS.

1 Merge duplicate records instantly

Load iMerge on as many workstations as you'd like. Any duplicate records your staff finds can be merged on the fly and according to your own business rules.

3 Merge organizational records

When merging organizational/company records, iMerge will also move the linked child records over as well.

5 Extensible with your custom rules

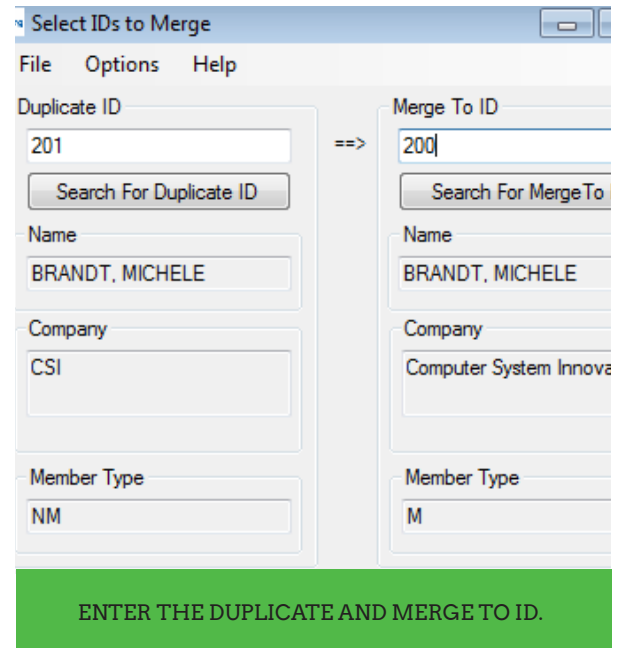

iMerge can call your custom stored procedures, or use one of ours, to do important things like keep the most recently used user name and pw, merge user defined data, and prevent your end user from merging two records they shouldn't.

2 Batch merging

Have a list of duplicates? Simply feed them into iMerge and they'll be merged all at once.

4 Supports merging non-iMIS tables

Third-party tables in your iMIS database can also be incorporated into the merge process.

What They're Sayin'

"Using iMerge is an easy way to combine a duplicate record without losing any of the member activity, dues, subscription or meeting history."

Laurie Newhouse
WISCONSIN REALTORS ASSOCIATION

You Got What It Takes?

- Requires iMIS 10.6 or higher
- Latest pricing detail and additional screenshots can be found at: www.csiinc.com/iMerge
