Modify staff site	✓	✗ ¹
Upgrade safe	✓	✓
Apply a single rule to multiple pages	✓	✗
Easily turn rules on and off	✓	✗
Supports URL redirects	✓	? ²
SEO-friendly changes	✓	✗
See all rules in one place	✓	✗
Easily move rules to other sites	✓	✗ ³
Inject custom CSS	✓	? ⁴
Supports iMIS 100/200/300 SaaS	✗	✓
Supports iMIS 300	✓	✓

¹ Cannot be modified without copying core staff pages (not recommended).

² JavaScript can redirect, but the user sees their screen flash, and it is not SEO-friendly.

³ JavaScript will be included in database backups and restorations, but it is not possible to only move JavaScript by itself.

⁴ JavaScript can modify and inject CSS on the page, but typically this results in a [flash of unstyled content](#) while the script loads.
