

Computer System Innovations, Inc. is a dynamic, team-oriented consultancy committed to providing value-added software solutions and support. We are a leading provider of consulting services to the association and iMIS user community. We value hard work, outstanding customer service, and the ability to have fun while doing what we do best.

We are looking for a talented, mid-level (3-5 years) software programmer. Qualified candidates must have a strong knowledge of object oriented design and development on the Microsoft .NET platform. In this role, you will be responsible for developing, supporting, maintaining, and debugging CSI's client related applications and web development projects using existing tools and methodology. The ideal candidate is a highly motivated, resourceful, self-starter capable of getting up to speed quickly and adhering to company standards. The candidate must have excellent verbal and written communication skills with a result-driven attitude.

Responsibilities:

- Ability to work as part of a team - Candidate will work closely with both the development and consulting teams to design, build, and test development projects
- Provide technical troubleshooting, configuration and deployment for both the applications and their underlying infrastructure
- Strong desire to investigate development issues, resolve problems, and communicate status
- Prioritize internal development activities along with urgent, often unscheduled, development requests with a high level of urgency and responsiveness
- Develop and maintain technical documentation
- Partner with consulting teams to support clients and remote users
- Communicate with third-party software vendors for additional support
- Assist with estimating development efforts and timelines
- Keep up-to-date on development techniques and apply those techniques when analyzing and developing system applications
- Flexible and open minded attitude as you may be called upon to troubleshoot client issues involving operating systems and software that you may not be an expert on

Qualifications:

Required Technical Skills

- Bachelor's degree in Computer Science or related field
- Minimum of 2 years of experience writing SQL, preferably for Microsoft SQL Server
- Minimum of 2 years of experience in application programming and/or web development
- Experience with C# and ASP.NET (Web Forms, MVC, and Web API)
- Experience with HTML, CSS, and JavaScript
- Experience developing relational database structures
- Strong mathematical and logical skills with extreme accuracy to detail
- Strong communication, organizational, and time management skills with the ability to multi-task
- Team player with the ability to work independently and efficiently
- Ability to develop, implement, and support comprehensive programming plans
- Ability to prioritize tasks, meet deadlines, and work well under pressure
- Demonstrate strong interpersonal skills, with team members, clients and counterparts

Additional Preferred Skills

- Experience with iMIS
- Experience with Kentico or other content management systems
- Experience with JavaScript frameworks and tools (Angular, Bootstrap, TypeScript)
- Experience with TFS (source control management, builds, testing)
- Experience with Microsoft Azure design patterns and cloud structure
- Experience with ConnectWise® Business Management Platform
- Experience in a small consulting firm environment

Our benefit package includes health, dental, vision insurance, 401(k), and much more!

All applicants applying must be authorized to work in the United States.
